PROJECT DESCRIPTION		
	r to accommodate large twin aircraft. The proposed building length is 217 feet and or opening/width of 48 feet, depth of 39 feet. Please see Future Phase 1-B on the	

JUSTIFICATION

Our Fixed Based Operator (FBO) continues to maintain a waiting list for hangars. This building will diversify our hangar offerings to expand availability of larger twin engine aircraft. The Airport considers this hangar an economic development project. Hangars will attract aircraft owners and in turn generate City personal property taxes.

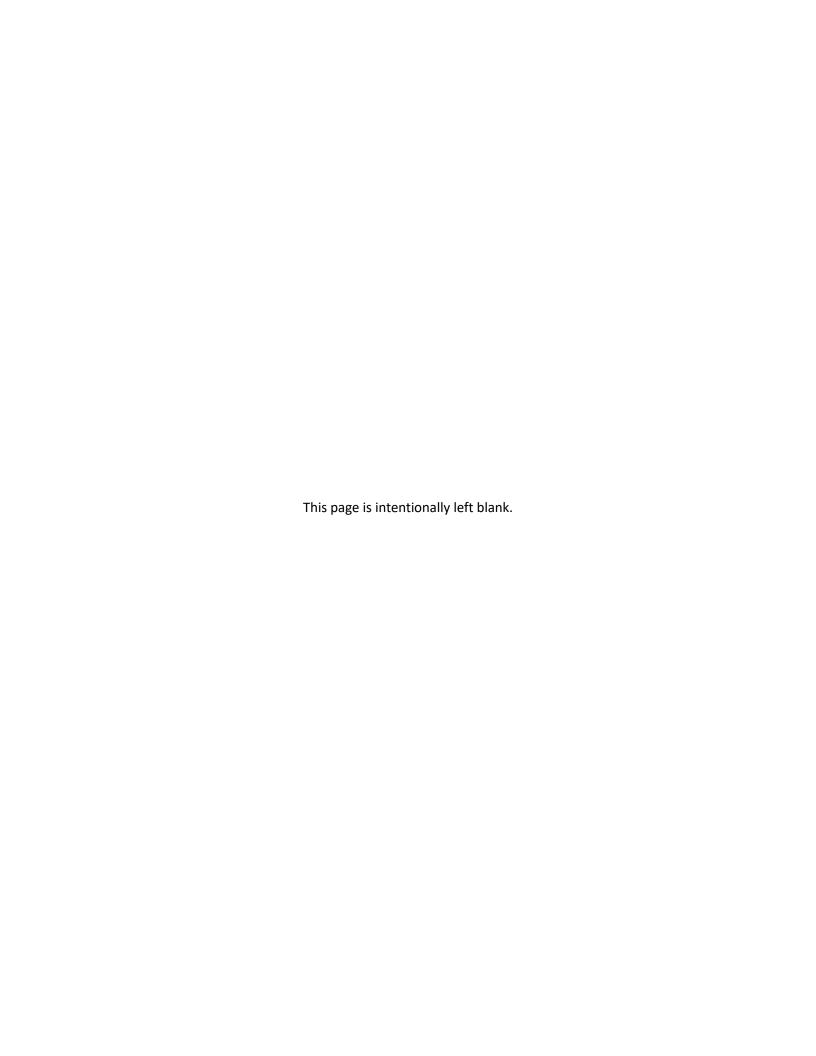

attached T-Hangar Schematic for location of the building in our South General Aviation Area.

STATUS

Airport management evaluated options to execute a ground lease with current FBO for the FBO to construct and subsequently lease hangar space. Optionally, the Airport proposed to build if a public/private partnership could not be accomplished. The project was bid in 2019 and all bids were rejected. Additional funding has been added to address anticipated re-bid amount.

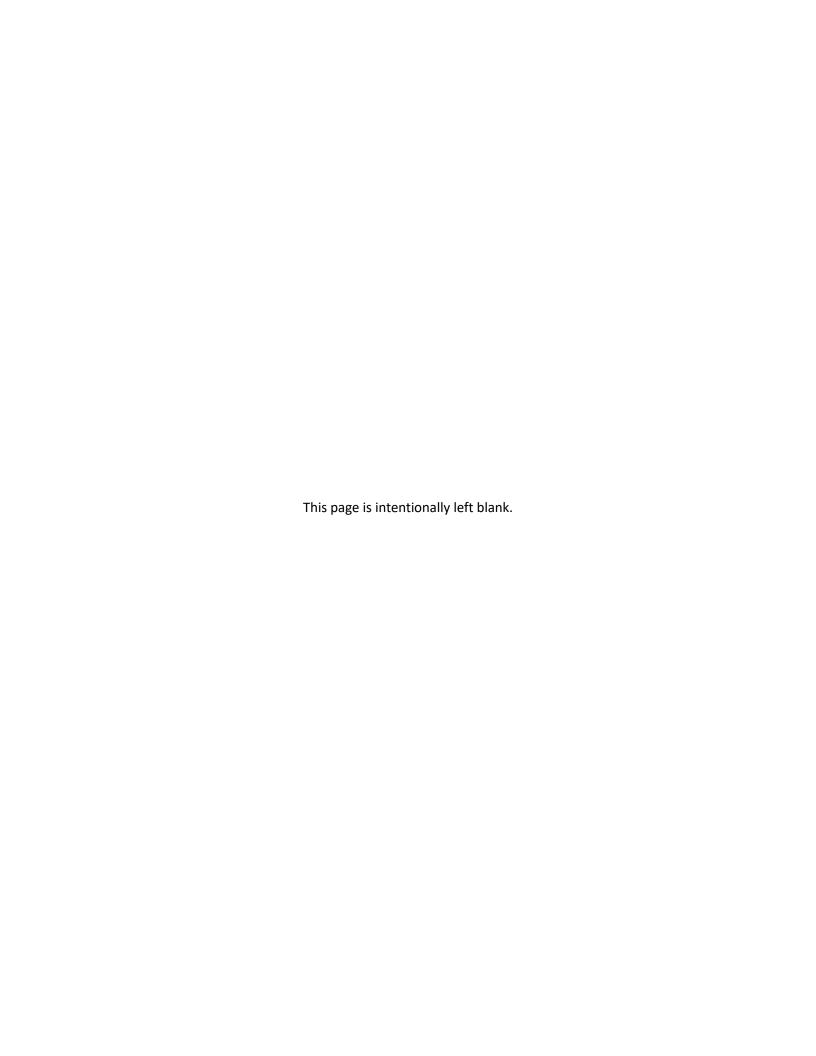

Consultant has begun the rebid process and pending sufficient and acceptable bids, a contract will be awarded in November 2021 with a construction completion date of June 30, 2022.

PROJECT DESCRIPTION	
The City requested and was granted a mitigation project for these facilities to reduce the chances of future flood damage to the thr	ree
facilities. Included in the project are the following items: water tight garage and walk-through doors, water tight floor outlets, floor check valves, raising of data ports, etc. Please reference attached PW1119.1	drain
JUSTIFICATION	
The building experienced flooding during Hurricane Matthew. As a part of the recovery, the building was cleaned and damaged elements such as doors were replaced. Since that time, the concrete slab on part of the building has settled causing an uneven floo leaks in the windows along one side of the building. This area of the building would be minimally repaired and converted to storage space. The remaining office space in the building would be renovated for staff.	
STATUS	
STATUS Improvements have been made to the HVAC units. Staff is working on waterproofing the 3 buildings to include raising data ports, raoutlets, and installing waterproof garage and entry doors. Staff may need to seek another extension on the mitigation at Alexander Street due to delays in the bid process.

PROJECT	DESCRIPTION		
Splash Pac	Is locations remaining to be completed	include E. Melvin Honeycutt and	Lake Rim School (subject to Council final approval),
and the Do	owntown Stadium Play Space and Foun	ain.	
-	ready completed include: Kiwanis, Mas		·
Splash Pac	Is were originally proposed at Cliffdale	and EE Miller Recreation Centers,	however, those plans have been cancelled.
JUSTIFIC	ATION		

•

Splash Pads were included as part of the March 2016 bond referendum.

STATUS

Construction is complete at the Kiwanis, Massey Hill, Gilmore and Myers splash pads (\$1,619,395).

The install at the Baseball Stadium entry plaza is delayed pending completion of the plaza construction and remediation of sewer issues. Construction and completion is now tentatively projected for FY 2022.

In December 2020, an additional Splash Pad & Playground project was approved for placement at E. Melvin Honeycutt Elementary, which was initiated and completed in FY 2021.

Also in December 2020, a Splash Pad project was approved for placement at Lake Rim Elementary School. This project was initiated in FY 2022 after further Council direction.

PROJECT DESCRIPTION

The Department recognized the need to relocate Fire Station #4 to a location better suited to meet the service demand of the area served and to provide safer and more adequate living conditions for City employees.

The department also plans to move its Logistics facility to this site and close/sell the current site at 307 Hope Mills Road. The Logistics Facility project is separate from Fire Station 4 project.

JUSTIFICATION

Fire Station #4 is an aged facility that is not compliant with current standards promulgated by the National Fire Protection Association (NFPA), Americans with Disabilities Act (ADA), and the Occupational Safety and Health Administration (OSHA). In addition to its age and compliance deficiencies, data analysis shows that the current location is not suited for the most efficient emergency response position. Its close proximity to Fire Station #2 leaves a huge service gap along the Northern end of Bragg Boulevard and connecting neighborhoods. This gap has been further compounded by the closure of Bragg Boulevard at the entrance to the Fort Bragg Army installation. The Department currently relies on automatic aid from Fort Bragg that will also be interrupted with this closure.

STATUS

A 2.5 acre parcel has been purchased at the corner of Bragg Boulevard and the Blanton Road Extension. Phase 1 environmental surveys have been completed with satisfactory results. An architect has been selected and is currently in the design phase with construction slated to begin February 2022.

PROJECT DESCRIPTION													
Projects include required or requirements. Projects rar r/w, the comprehensive W portion for Grant Funded	nge from large Vatershed Mas	Capital Impro ter Planning E	ovements to ad Effort, the DAP	dress localized f that addresses	looding, lev	els of service 8	k impacts with	nin the City					
JUSTIFICATION													
Projects are identified through detailed analysis of the drainage systems maintained by the City. The detailed analysis includes watershed and neighborhood studies, investigation of flooding complaints and other internal reports. The Locks Creek and Wayland Drive projects have been identified through grant opportunities that provide additional funding mechanisms to address flooding issues hat while outside of the r/w, provide a large scale public good.

PROJECT DESCRIPTION This project provides for in extending a canopy in the while fueling.			-			_						
			rical work to pov	wer the entire	Grove Street Fa	acility including	g Solid Waste.	FY 2024				
IUSTIFICATION FAST's Grove Street facility is a critical location during emergencies such as hurricanes Florence and Matthew. The facility does not have a back-up generator, which hinders communications, bus servicing, and technology systems. In addition, employees often must standby at this location awaiting emergency assignments without electricity. We also experience power outages during normal operations, which impacts our ability to serve our customers, particularly our ADA customers.

PROJECT DESCRIPTION This project is for the installation of bus shelters are pad, wheelchair access to adjacent sidewalks or passolar light and signage. The estimated useful life is stops that have 20 or more boardings per day and JUSTIFICATION A key improvement identified in the Transit Development is a new stop or an existing stop, an anor shelter. Several factors are reviewed, to include	Financially Sound City Providing Exemplary Services Collaborative Citizen & Business Engagement Collaborative Citizen & Business Engagement and benches at FAST bus stops. Each new location includes at least a 4'x 20' concrete pricing lots, and installation of a prefabricated bench and/or shelter, trash receptacle, 20 years. City Council has adopted service standards call for FAST to install shelters at benches at stops with 10 or more boardings per day. Compared to determine if the location is in need of, and can support, a bench compared to determine if the location is in need of, and can support, a bench compared to determine if the location is in need of, and can support, a bench compared to determine if the location is in need of, and can support, a bench compared to determine if the property, additional site and the property of the property, additional site and the property of the property of the property. The demand for stop locations
As of September 2021, there are 103 sheltered sto Council modified the threshold for adding a shelte	ps at 613 active stops (16.8%) and 41 standalone benches (6.7%) - Total is 23.5%. City to 15 or more average boarding per day and 6 or more average boarding per day for ing occur at stops that have a bench and/or shelter.
