9.0 PUBLIC HEARINGS

9.01 P15-17F. The issuing of a Special Use Permit to allow for Office Use within 100 feet of residential in the Hospital Area Overlay and to be located at 1601 Owen Drive and 529 Terry Circle, and being the property of Fayetteville Area Health Education Foundation.

Mr. Craig Harmon, Senior Planner, presented this item with the aid of a PowerPoint presentation and stated Southern Regional Area

Health Education Center (SR-AHEC) wishes to redevelop their current site while maintaining the use of most of their existing office space during construction. Currently SR-AHEC operates 39,400 square feet of office space on this property. This new construction will increase their space to 55,000 square feet. Parking on the current site is at a premium. This proposed construction will increase the parking capacity by nearly 100 spaces. Attached are site plans showing not only the new development, but also how the phasing of the construction This Special Use Permit (SUP) is part of a two-part will occur. process for the applicant. The applicant has also applied for a conditional rezoning as part of their site plan approval. The conditional zoning will address many issues such as the building design, setbacks and street buffering. The current SR-AHEC offices were built prior to the adoption of the Hospital Area Overlay (HAO) district. The HAO requires a SUP for any office built within 100 feet of a residential zoning district. On June 9, 2015, the Zoning Commission held a public hearing on this case. There was one speaker in favor and one in opposition. The Commission voted 4 to 0 to recommend approval.

The Zoning Commission and Staff recommend approval of the SUP based on the following:

- 1. The Hospital Area Plan calls for office use on this property.
- 2. This is the redevelopment of an existing business.
- 3. Approval of a condition rezoning to address site plan issues on the property.

 $\ensuremath{\operatorname{Mr.}}$ Harmon stated the SUP must meet the following findings of fact:

- 1. The special use complies with all applicable standards in Section 30-4.C, Use-Specific Standards;
- The special use is compatible with the character of surrounding lands and the uses permitted in the zoning district(s) of surrounding lands;
- 3. The special use avoids significant adverse impact on surrounding lands regarding service delivery, parking, loading, odors, noise, glare, and vibration;
- The special use is configured to minimize adverse effects, including visual impacts of the proposed use on adjacent lands;
- 5. The special use avoids significant deterioration of water and air resources, wildlife habitat, scenic resources, and other natural resources;
- 6. The special use maintains safe ingress and egress onto the site and safe road conditions around the site;
- 7. The special use allows for the protection of property values and the ability of neighboring lands to develop the uses permitted in the zoning district; and
- 8. The special use complies with all other relevant City, State, and Federal laws and regulations.

Discussion ensued.

This is the advertised public hearing set for this date and time. The public hearing was opened.

Ms. Lori Epler, 1333 Morganton Road, Suite 201, Fayetteville, NC, appeared in favor and stated for the record there had been a typo, and the property in question is located at 1601 Owen Drive, not 6101. Ms. Epler requested Council approve the SUP.

Mr. Herbie Hames, 279 Church Street, Concord, NC 28025, appeared in favor and stated this is a unique situation and requested Councilapprove the SUP.

There being no one further to speak, the public hearing was closed.

MOTION: Council Member Hurst moved to approve the SUP for office use within 100 feet of residential development in the Hospital Area Overlay, as presented by staff, and that the application is consistent with applicable plans because (1) the properties in question are within the Hospital Area Overlay District, (2) this use will maintain visual separation and buffers from any single-family residences, and (3) the proposed SUP is in the public interest because the proposed SUP does fit with the character of the area along Owen Drive, and upon a finding that all of the eight standards are met. SECOND: Council Member McDougald

9.02 Code Amendment to Chapter 30 for corrections and minor adjustments (Misc. Set 12)

Ms. Karen Hilton, Planning and Zoning Manager, presented this item and stated Text Amendment Standards in Article 30-2.C.2(e) provide that amending the text of the Unified Development Ordinance (UDO) is a matter committed to the legislative discretion of the City In determining whether to adopt or deny the proposed the City Council shall consider and weigh the Council. amendment, recommendation of the Planning Commission and relevance of seven factors specified in Article 30-2 as well as factors associated with the particular regulation. This amendment makes a small adjustment to the allowed size of accessory structures and what are considered corrections in four parts of theUDO. There are four separate changes. Three are very minor, on the order of corrections; explanations are provided within the draft amendment. One adjustment that staff does consider more substantial is the recommendation to allow larger accessory structures in both residential and commercial districts. The current standard is the lesser of a specific total square footage, which varies by zoning district, or of a specific percentage of the allowed building area (and the percentage varies by zoning district). The intent is to keep the accessory structures reasonably related in size to both the lot and the principal building. The effect for larger lots is to be overly limiting in the allowed area. The intent in the one more substantive change is to keep the accessory structures reasonably related in size to both the lot and the principal building. The effect for larger lots is to be overly limiting in the allowed area. The proposed change allows a larger accessory structure on large residential lots and particularly on large residentially zoned lots adjacent to commercially zoned properties. It also adjusts the setback when an accessory structure is over 700 square feet to require an additional five foot setback.

This is the advertised public hearing set for this date and time. The public hearing was opened.

9.03 Downtown Sign Code and Design Guidelines
